

The Antineoplastic Drug Administration Course (ADAC)

Changing Boards: Black, white and virtual

ADAC – What is it?

ADAC supports health professionals develop the necessary knowledge and clinical skills to administer antineoplastic drugs and handle related waste safely.

1. an **online, blended learning** course
2. designed to **standardise education**
3. set the minimum **level of competency**

ADAC uses eviQ online content:

- evidence based, best practice, current resources, and protocols – for use at point of care

Registered Users: eviQ

ADAC – Where is it?

- ❑ Across all Australian states and territories
- ❑ New Zealand – request for access
- ❑ UICC has interest in ADAC for low income / developing countries
- ❑ Currently implemented in over 200 cancer centres: public and private (nationally)
 - ❑ ADAC is transferable between facilities
 - ❑ Competency framework and facilitator tools
 - ❑ Aligns with EdCan, Cancer Learning and National Safety and Quality Health Service Standard 4: Medication Safety
- ❑ Meets several goals of the NSW Cancer Plan: ongoing commitment to sustainable online future educational programs

ADAC – How is it available?

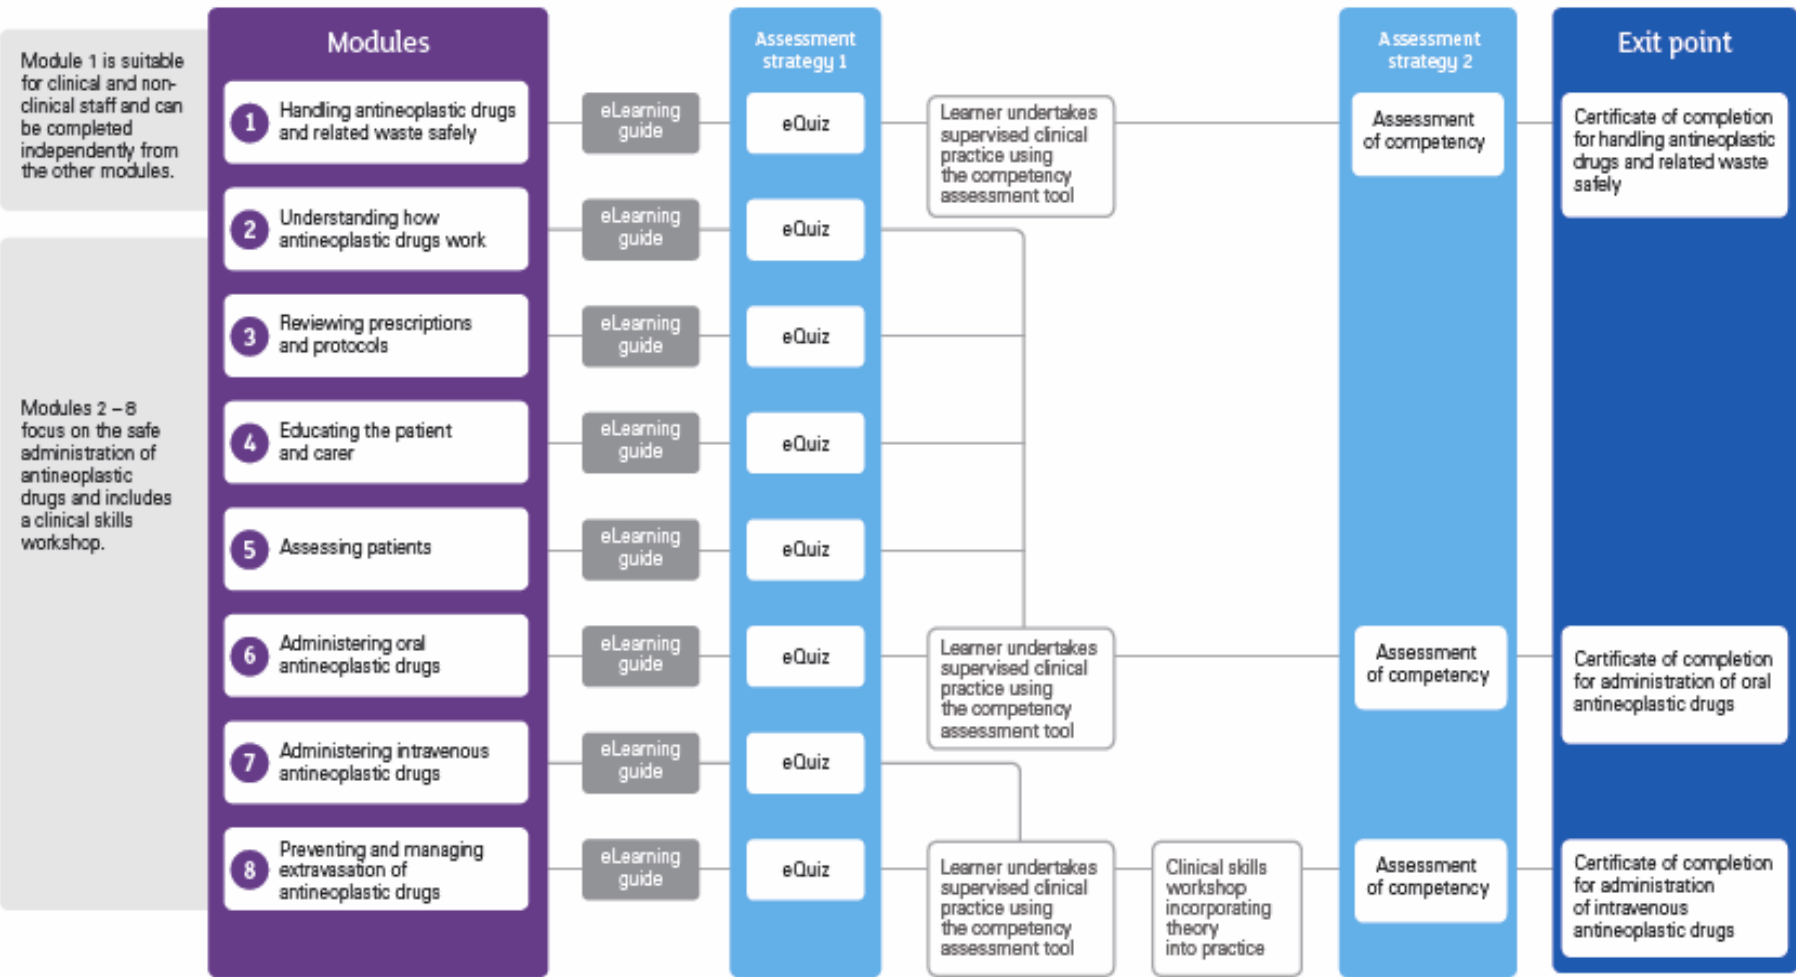

Online, blended learning:

1. via Learning Management System
 - LMS tracks and records progress of participantor
2. Directly from eviQ Education website
 - Online users need to record and collect the results manually

Antineoplastic Drug Administration Course (ADAC)

Developed by the Cancer Institute NSW • Implemented by health care organisations

Free registration at www.eviq.org.au

ADAC – The future

- ❑ Increased learner engagement through technology
- ❑ Online using
 - Case studies
 - Problem solving
 - Gamification

ADAC recognises transition of cancer nursing education

- **from the past** - courses were managed locally: variations in standard of education – blackboard era
- **to the present** - blended online learning: standardised eLearning and using local guidelines and ADAC trained facilitators - whiteboard technology at local level
- **and into the future....** innovative, interactive eLearning using virtual classroom, standardised online content -available globally 24/7 at point of care
